5.

Study the figure below, a graph showing GNI per person and food consumption per person for selected countries.

(a) Plot the following data on to the figure above.

Country	GNI (US\$ per person per year)	Food consumption (kilocalories per person per day)
Botswana	16 000	2300

(1)

(b) Which country is identified by the following data?

GNI (US\$ per person per year)	Food consumption (kilocalories per person per day)
32 000	3200

(1)

(c) Draw a best fit line on the figure above.

(1)

(d) Describe the relationship between GNI and food consumption shown in the figure above.

---

---

---

---

(2)

(e) Outline **one or more** reasons for the link between GNI and food consumption.

---

---

---

Give **one** way in which a major city in a LIC/NEE is regionally important.

Name of city \_\_\_\_\_

Regional importance \_\_\_\_\_

---

---

(Total 1 mark)

23.

Study the text below, a newspaper extract about urban change in sub-Saharan Africa.

**Housing in sub-Saharan Africa improves but millions still live in slums**

A new study of housing quality in sub-Saharan Africa states “there has been a dramatic improvement in living conditions during the past 15 years”.

Researchers found housing had improved across several measures during the period. Amount of living space, access to water and sanitation, and good quality construction were found in 23% of houses in 2015, up from 11% in 2000.

The study’s author said, “Our study shows that many people are investing in their homes, but there is also an urgent need for governments to help improve infrastructure.”

Explain how urban planning is improving quality of life for the urban poor.

Use the extract above and a LIC/NEE example you have studied.
