TEACHING & LEARNING

HALF TERM 6

Concrete Examples

The first bitesize this half term was based on concrete and abstract examples where he explained that we, must break down abstract ideas and concepts in a way that makes them more tangible and relatable to our students. By providing concrete examples, students can build schema, enhance their understanding, and make connections to larger

<u> Literacy – Oracy</u>

Mrs. Barker rounded off the Bitesizes this half term, sharing the strategy around Oracy from September.

She explained how Oracy is such a vital part of developing literacy and speaking skills. She then went onto explain how **Think**, **Pair**, **Share** and **Say it again better**, will form a key part of lesson structures moving forward in September.

Mrs. Barker shared examples of good practice in her lessons and how she has been able to get 8 set 3 to have more structured talk, using think, pair, share strategies she has develope

Literacy – Reading and Vocabulary

Mrs. Green started the 2 weeks of literacy Bitesizes, recapping how we use reciprocal reading, in lessons to effectively support pupils reading. Pupils should be exposed to the following strategies each time they are presented with a text:

Predict – What is the text about? Clarify – Clarify new vocabulary and phrases. Question – After reading the text, ask comprehension questions about it. Summarise – Give a short summary of the text in 3-5 words.

Mr. McKie then shared the data around reading tests and how most pupils have been able to improve their functional reading ages through the constant hard work and dedication of both staff and pupils around literacy!

In the spotlight!

Miss Matulko has been modelling examples to pupils, of metacognitive talk, through effective use of her visualizer in lessons, allowing pupils to see the thought process of a specialist, firsthand.

~

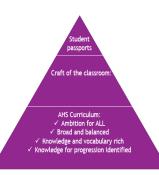

Miss Swallow has also been using effective modelling and demonstration in lessons, where pupils are called to the front for a 'masterclass' where they watch how to complete a task and then are able, through scaffolding of the task, to complete this at an expert level.

Mrs Doyle has been effectively cold-calling students in lessons. She does not allow pupils to opt out with short responses and has tried to really develop oracy skills of 'Say it again better'.

Further Reading: Walkthru pages 124 – 125 (Concrete Examples)

<u>SEND</u>

SEND are front and centre of what we do!

- Regularly check in on SEND
- Target questions to students
- Use passport information to support.
- Make instructions as clear and explicit as possible.
- Using scaffold and model answers where possible and then gradually remove these.
- Identify which students have SEND.

We must all ensure that we are using the triangle that Mr. McNamara shared with us all to support SEND students in lesson. There should be no differentiation in the curriculum offer between SEND/Non-SEND – everyone has access to the same ambitious curriculum. Quality First Teaching is how we deliver the curriculum with responsive and adaptive teaching.

Coaching training

On 10th July, members of the curriculum leadership and the teaching and learning teams, took part in instructional coaching training with Chris Moyse. Staff learnt how to become effective coaches within school and how different types of coaching work. Staff benefited from the session as they all came away with means of how to implement coaching effectively within their faculty.

Coaching update

If you have a particular CPD focus that you would like to work collaboratively on, or you have a particular class in mind that you would like further coaching support with, then send an email to Mrs. McNamara and one of the TLC team will be more than happy to help.

Caches observe lessons and select the area which they thick will tasche's practice. They then identify how the tascher can improve monagenite, have used mays for inprovement. Yindy, they design practice for teachers and give them feedback in before the tascher attempts the new technique in their classroom, incorcers their weblies classroom badis.	controlled conditions
instructional costning assumes that there are some areas where the coached is more newles and that the coach, being more separt, will guide their improvement in those areas.	
This doesn't only apply to new teachers – all teachers have areas in which they can improve, and the most efficient way of doing this is to undergo direct, explicit instruction .	Ambition

6

Thank you to all staff who have taken part in and attended Bitesize sessions this last half term. Thank you for your brilliant TLC discussions and for constantly trying and sharing strategies with everyone!
